VLT TOKENOMICS

VERSION 3.1 - TOKEN ALLOCATION UPDATE

BNB Smart Chain | November 9, 2026

200,000,000 VLT

FIXED SUPPLY - NO MINTING

Official Mainnet Contract

0xE90714e6e4becEc65F33D3099F95B42B6e3168aE

Verified Exact Match on BscScan

THIS EDITION SUPERSEDES PRIOR ALLOCATION AND PRESALE PLANNING

147M LOCKED / VESTING | 53M UNLOCKED ALLOCATIONS

Executive Tokenomics Summary

VoltPay (VLT) maintains a fixed supply of **200,000,000 VLT** on BNB Smart Chain. Version 3.1 updates the allocation record following the unsuccessful GemPad presale, the creation of a 25 million VLT Ecosystem Reserve Lock, and the segregation of unlocked holdings into disclosed wallets.

Revision notice: This document supersedes the token distribution and presale planning figures in Version 3.0 Rev2 (September 2026). The deployed contract, fixed supply, decimals and transaction fee rates are unchanged.

Current status: Trading has been enabled at the contract level. Initial PancakeSwap V2 liquidity has not yet been funded and deposited; a live DEX market is not being represented as launched.

Core Parameters

Parameter	Current Mainnet / Project Setting
Network	BNB Smart Chain (BSC Mainnet) / Chain ID 56
Token	VoltPay (VLT)
Total Supply	200,000,000 VLT (fixed; no minting)
Decimals	18
Buy Fee / Sell Fee	2% / 4%
Fee Processing	Authorized manual processFees()
Processed Fee Allocation	50% Liquidity / 50% Treasury
Trading / Initial LP	Enabled on-chain / Initial liquidity pending
Mainnet Contract	0xE90714e6e4becEc65F33D3099F95B42B6e3168aE

Final Distribution - Version 3.1

Allocation	VLT	Supply
Strategic Reserve	100,000,000	50.0%
Founder - Locked	10,000,000	5.0%
Team Vesting	10,000,000	5.0%
Strategic Investor Vesting	2,000,000	1.0%
Ecosystem Reserve Lock	25,000,000	12.5%
Liquidity / Launch Preparation	20,000,000	10.0%
Founder - Unlocked	10,000,000	5.0%
Marketing & Community	7,000,000	3.5%
Exchange Listings	6,000,000	3.0%
Development & Operations	5,000,000	2.5%
Future Funding	5,000,000	2.5%
TOTAL	**200,000,000**	**100.0%**

Allocation status: 147,000,000 VLT (73.5%) locked or subject to vesting; 53,000,000 VLT (26.5%) held in disclosed unlocked allocations. Unlocked does not necessarily mean circulating.

1. Allocation Strategy

The following allocations are part of the same fixed 200 million VLT supply. Amounts are not additive to any separate wallet or locker balances described later in this document.

1.1 Strategic Reserve - 100,000,000 VLT (50%)

A long-term reserve intended to support substantial ecosystem initiatives, strategic growth and future approved uses. The allocation is secured by an on-chain PinkLock record until **7 October 2027, 12:00 UTC**.

1.2 Founder Allocation - 20,000,000 VLT (10%)

The Founder Allocation represents the founder's disclosed personal token holdings. It consists of **10,000,000 VLT locked** until 7 October 2027, 12:00 UTC, and **10,000,000 VLT unlocked** in a separately disclosed Founder wallet. Founder tokens are accounted for separately from project operating reserves.

1.3 Ecosystem Reserve - 25,000,000 VLT (12.5%)

A new Ecosystem Reserve Lock was created on **9 November 2026** for long-term ecosystem purposes. The stated unlock date is **9 November 2027, 12:00 UTC**. The applicable lock record is verifiable through PinkLock.

1.4 Liquidity / Launch Preparation - 20,000,000 VLT (10%)

18,000,000 VLT is held in the dedicated Liquidity Reserve wallet and **2,000,000 VLT** in the Mainnet Deployer wallet for initial DEX launch preparation. These tokens are not currently represented as deposited into a PancakeSwap pool. Pool liquidity also requires funding in BNB.

1.5 Team and Strategic Investor - 12,000,000 VLT (6%)

The **10,000,000 VLT Team Allocation** is covered by eleven individual vesting records. A separate **2,000,000 VLT Strategic Investor Allocation** is under its published vesting schedule. The previous documents specify a first scheduled release on 7 December 2026, 12:00 UTC, followed by 10% every 30 days, subject to the respective on-chain records.

1.6 Growth, Listings, Operations & Funding - 23,000,000 VLT (11.5%)

- **7,000,000 VLT - Marketing & Community:** communications, creator and community campaigns, and approved promotion.
- **6,000,000 VLT - Exchange Listings:** future exchange and market infrastructure activities, subject to third-party terms.
- **5,000,000 VLT - Development & Operations:** technical development and token-project operations.
- **5,000,000 VLT - Future Funding:** future financing and disclosed strategic token arrangements.

Ownership disclosure: Dedicated unlocked wallets are separately identifiable on-chain, but are not independent outside investors merely because they have different addresses. No wallet allocation should be described as a time lock without a corresponding verifiable locking contract.

2. Locks, Vesting & Circulating Supply

VoltPay reports token allocations and actual transfer restrictions separately. Lock and vesting records are verifiable on-chain; the snapshot below reflects the allocation status reported on **9 November 2026**. Current released or remaining balances may change thereafter.

2.1 Lock & Vesting Snapshot - November 9, 2026

Allocation	VLT	Unlock / Vesting Schedule
Strategic Reserve	100,000,000	7 Oct 2027, 12:00 UTC
Founder - Locked	10,000,000	7 Oct 2027, 12:00 UTC
Team Vesting	10,000,000	Individual monthly schedules; first release 7 Dec 2026
Strategic Investor	2,000,000	Monthly vesting; first release 7 Dec 2026
Ecosystem Reserve	25,000,000	9 Nov 2027, 12:00 UTC
TOTAL	**147,000,000**	**73.5% of fixed supply**

The Team allocation uses eleven separate vesting records; the investor schedule is separate. Detailed release dates, beneficiary addresses and record IDs should be checked against the relevant PinkLock entries rather than inferred from this summary.

Verify VLT token locks on PinkLock

2.2 Historical Lock Update

A previous 20,000,000 VLT Investor Protection Lock reached its release condition and its tokens were withdrawn before the current restructuring. The new **25,000,000 VLT Ecosystem Reserve Lock** is a distinct, newly created commitment. The complete record should be assessed through transaction and locker history.

2.3 Circulating-Supply Policy

Important: 53,000,000 VLT is the total **unlocked allocation**, not a verified circulating-supply figure. Locked tokens, founder holdings, treasury-controlled reserves, market-held balances and tokens deposited into active DEX liquidity are different categories.

The project will use confirmed on-chain records and actual market distribution when reporting circulating supply. The fixed supply is 200 million VLT, regardless of lock status. External market-data providers may apply different methodologies.

2.4 LP Tokens Are Different from VLT Token Locks

Locks on VLT held in PinkLock do not lock liquidity-provider (LP) tokens. Once initial PancakeSwap liquidity is added, any LP token lock must be announced with its own contract, amount, duration and verification link.

3. Dedicated On-Chain Wallet Allocations

The following seven disclosed addresses hold the 53,000,000 VLT unlocked allocation as reported following the November 9, 2026 restructuring. Amounts represent the post-distribution snapshot, not guaranteed future balances. All addresses are on BNB Smart Chain.

Allocation	Balance / Supply	Public Wallet Address (BscScan)
Mainnet Deployer / Launch	2,000,000 VLT / 1.0%	0x5C6D50A3f249C8a5c48029Cf0c119E760Af48dD4
Liquidity Reserve	18,000,000 VLT / 9.0%	0x9DD74d4817a1160c5474D899746AD0C1d6F03223
Marketing & Community	7,000,000 VLT / 3.5%	0xB4811829f30F42248A52B63040943C8aC24b8805
Exchange Listings	6,000,000 VLT / 3.0%	0x698Ce039C0b951e88e4AC4c85099aE2f54bE97B9
Development & Operations	5,000,000 VLT / 2.5%	0x8D950eA14fE8C60a12820305ddFc7B5e6B1663C2
Future Funding	5,000,000 VLT / 2.5%	0x54B421424a52C5D05CD185AA4C3EFBf742234E45
Founder - Unlocked	10,000,000 VLT / 5.0%	0x4b89E0ff7aC48646a1Cd0C48bfDeE658DaF57646

Wallet Disclosure and Control

These addresses were created to keep purposes and transaction histories distinguishable. They are **not separate independent token holders** merely by being assigned different wallet names; the unlocked wallets remain under project/founder control and are **not time-locked**. Transfers from these addresses should be reviewed directly on BscScan.

How to Verify Wallets

- Select an address from the table to open its full BscScan account page and review current VLT balances and transfers.
- Compare live balances against the November 9 snapshot before using the figures for current market analysis.
- Check PinkLock separately for locked and vesting allocations; their beneficiary addresses are governed by the specific locker terms.

Supply reconciliation: 147,000,000 VLT locked / vesting + 53,000,000 VLT in unlocked allocations = **200,000,000 VLT**. The 20,000,000 VLT liquidity allocation already includes the Deployer and Liquidity Reserve wallets listed here.

4. Presale Outcome & DEX Preparation

4.1 Historical GemPad Presale

The VLT presale on **GemPad** has ended without reaching its required soft cap of **26 BNB**. The campaign was not a successful fundraising event. The unused presale tokens were returned to project control and reflected in the November 2026 allocation restructuring.

Historical Parameter	Result / Disclosure
Platform / Network	GemPad / BNB Smart Chain
Presale Status	Completed - soft cap not reached
Soft Cap	26 BNB
Historical Presale Price	USD 0.0068 per VLT
Earlier Target Listing Price	USD 0.0076 per VLT (not a live price)
Investor Refunds	Subject to the GemPad contract; individual refunds require verification

View historical GemPad sale record

4.2 PancakeSwap V2 Launch Preparation

The VLT/WBNB pair has been created on PancakeSwap V2, and trading is enabled at the token contract level. **Initial pool liquidity has not yet been added** at this document date. The amount and value of initial liquidity, an executed LP lock and a live listing link will be published only after the relevant on-chain transactions are confirmed.

Launch distinction: A deployed token, an existing pair address, and an enabled trading flag do not by themselves establish an active liquid market. The original listing price of USD 0.0076 is a historical planning target and is not a guaranteed or current market price.

5. Fee & Liquidity Model

VLT applies a **2% buy fee** and **4% sell fee** under the current configuration. Collected VLT fees accumulate in the contract. Conversion and liquidity processing require an authorized call to **processFees()**; they are not automatically executed with every transfer.

Fee Flow	Allocation / Mechanism
Liquidity share	50% of processed fee value is allocated to liquidity support.
Treasury share	50% of processed fee value is allocated to VLT token Treasury accounting.
Fee-created LP	LP tokens from fee processing are sent to the contract's designated burn address.
Initial LP	Separate from fee-created LP; any lock is pending until executed and verifiable.

Actual revenue and liquidity depend on genuine trading activity, fees incurred, execution conditions and the availability of sufficient pool funds. No trading volume, fee revenue or price performance is guaranteed.

6. Utility & Ecosystem Role

VLT is intended to serve as the ecosystem token associated with VoltPay applications and future integrations. Functionality is subject to product readiness, third-party availability, operational requirements and applicable regulations.

- VLT transfers and potential payments through compatible VoltPay interfaces.
- Wallet-native token utility and ecosystem-access use cases.
- Potential merchant or marketplace payment integrations.
- Approved community incentives and rewards, if implemented.
- Potential gas-sponsored transfers in eligible official clients; not a currently guaranteed service.

7. Sustainability & Transparency

Sustainability plans combine disciplined token reserves, fee-supported liquidity where genuine trading occurs, and potential product integrations. Revenue is neither automatic nor guaranteed. Token operating reserves are separate from personal founder holdings and from the accounts of **VOLT-LABS LLC**, the wallet/application company.

- Publish material token-allocation and locker changes with on-chain verification.
- Monitor holder concentration, liquidity depth and related risks.
- Avoid artificial volume, fake holder counts and misleading price or market-cap claims.
- Keep unlocked founder and token-project reserves separately identified.

7.1 Mainnet & Verification References

Item	Reference

Official Transparency	https://voltpay.org/transparency
Third-Party Audit & KYC	https://app.cyberscope.io/audits/10-vlt

Cyberscope publishes a smart-contract audit and project KYC record for VLT. Audit findings must be interpreted with their published status; an audit does not guarantee that all risks are removed. Token contract security is distinct from security of a wallet application or backend.

8. Risk Disclosure

VLT is a cryptoasset that can lose value. Token locks do not guarantee a price floor; holders may face market volatility, concentrated holdings, smart-contract or operational risks, exchange failures, insufficient liquidity, and regulatory uncertainty. This document does not promise profits, a specific launch date, any exchange listing, or future functionality. It is not legal, tax or investment advice.

VOLTPAY (VLT)

TOKENOMICS

VERSION 3.1 - NOVEMBER 2026

Transparent token allocations, verifiable locks and accountable reserves.
